

BIOLOŠKO POMEMBNE SPOJINE

UČNI NAČRT PREDMETA/COURSE SYLLABUS

| | |
|-----------------------------------|----------------------------------|
| Predmet: | Biološko pomembne spojine |
| Course title: | Biologically important compounds |
| Članica nosilka/UL Member: | UL FKKT |

| Študijski programi in stopnja | Študijska smer | Letnik | Semestri | Izbirnost |
|--------------------------------------|---------------------------------|-------------------------|----------|-----------|
| Biokemija, druga stopnja, magistrski | Ni členitve (študijski program) | 1. letnik, 2. letnik | | izbirni |

| | |
|--|---------|
| Univerzitetna koda predmeta/University course code: | 0072191 |
| Koda učne enote na članici/UL Member course code: | BI2112 |

| Predavanja /Lectures | Seminar /Seminar | Vaje /Tutorials | Klinične vaje /Clinical tutorials | Druge oblike študija /Other forms of study | Samostojno delo /Individual student work | ECTS |
|-------------------------|---------------------|--------------------|---|---|---|------|
| 30 | | 45 LV | | | 75 | 5 |

Nosilec predmeta/Lecturer: prof. dr. Bogdan Štefane

Vrsta predmeta/Course type: izbirni strokovni/Elective Professional

| | | |
|--------------------------|----------------------|-------------------------|
| Jeziki/Languages: | Predavanja/Lectures: | Angleščina, Slovenščina |
| | Vaje/Tutorial: | Angleščina, Slovenščina |

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Študent oz. kandidat mora imeti predmet opredeljen kot študijsko obveznost.

Prerequisites:

The course has to be assigned to the student.

Vsebina:

Eterična olja

Pomembni viri in glavne sestavine posameznih eteričnih oljih.

Lastnosti eteričnih olj (kot so eterično olje bazilike, citrusov, kadulje, evkaliptusa, sivke, rožmarina, klinčkov, konoplje, itd.), izolacija in pretvorbe njihovih glavnih sestavin.

Odoranti in flavoranti

Struktura spojin, ki so odgovorne za specifičen okus in vonj.

Uporaba in najpogostejše polysintezne in sintezne poti, ki vodijo do tovrstnih spojin.

Alkaloidi

Sistematika alkaloidov.

Content (Syllabus outline):

Essential oils

Important sources and main components of essential oils.

Properties of essential oils (for example essential oil of basil, citrus, evkaliptus, lavanda, rožmarin, cloves, cannabis, etc.), isolation and transformations of their main components.

Odorants and flavourings

Structure of compounds responsible for specific taste and smell.

The use and the main semi-synthetic and synthetic ways leading to these compounds. **Alkaloids**

Systematics of alkaloids. Sources and properties of alkaloids.

Isolations of alkaloids.

The medicinal use of typical alkaloids. Semi-synthetic

| | |
|--|--|
| <p>Pojavnost alkaloidov in njihove lastnosti. Postopki za izolacijo alkaloidov.</p> <p>Uporaba tipičnih alkaloidov v medicinske namene.</p> <p>Polsintezne in sintezne poti najpomembnejših alkaloidov.</p> <p>Naravni produkti kot spojine vodnice za razvoj sinteznih produktov</p> <ul style="list-style-type: none"> • primeri v medicinski kemiji • primeri v sintezni kemiji • primeri v kemiji materialov <p>primeri v kemiji živil</p> | <p>and synthetic ways leading to the most important alkaloids.</p> <p>Natural products as leading compounds in development of synthetic products</p> <ul style="list-style-type: none"> • examples in medicinal chemistry • examples in synthetic chemistry • examples in chemistry of materials <p>examples in food chemistry</p> |

Temeljna literatura in viri/Readings:

| |
|---|
| <ol style="list-style-type: none"> 1. <i>Modern Alkaloids: Structure, Isolation, Synthesis and Biology</i>, E. Fattorusso and O. Tagliatela-Scafati eds., Wiley-VHC, Weinheim, Germany, 2008 (nekatera poglavja/some chapters; 50 str. od 641). 2. <i>Flavours and Fragrances: Chemistry, Bioprocessing and Sustainability</i>, R. G. Berger ed., Springer, Berlin, Germany, 2007 (nekatera poglavja/some chapters; 100 str. od 621). 3. Titus A. M. Msagati, <i>Chemistry of Food Additives and Preservatives</i>, John Wiley & Sons, Oxford, UK, 2013 (nekatera poglavja/some chapters 80 str. od 314). |
|---|

Cilji in kompetence:

| | |
|--|---|
| <p>Učna enota prispeva k razvoju naslednjih splošnih in specifičnih kompetenc:</p> <p>Študent se seznani z viri in uporabo naravnih spojin,</p> <ul style="list-style-type: none"> • poznavanje pomembnih virov in lastnosti naravnih produktov, • študent spozna poglobitve polsintezne in sintezne pretvorbe naravnih produktov. | <p>Objectives and competences:</p> <p>To become familiar with sources and applications of natural compounds</p> <ul style="list-style-type: none"> • knowing important sources and properties of natural products, • knowing important semi-synthetic and synthetic transformations of natural products. |
|--|---|

Predvideni študijski rezultati:

| | |
|--|---|
| <p>Znanje in razumevanje</p> <p>Študent pozna:</p> <ul style="list-style-type: none"> • biološko pomembne naravne produkte, • njihove najpogostejše vire, • njihove lastnosti, • uporabo, • glavne polsintezne in sintezne pretvorbe. <p>Uporaba</p> <p>Poznavanje navedene vsebine bo študent lahko uporabil pri svojem nadaljnjem strokovnem razvoju. Pridobljena znanja mu bodo omogočila hitrejši in učinkovitejši pristop k reševanju problemov s področij kemije naravnih spojin.</p> <p>Refleksija</p> <p>Študent je sposoben načrtovanja izolacije posameznih naravnih produktov, čiščenja in karakterizacije. Sposoben je kritično ovrednotiti rezultate glede na skladnost z literaturnimi opisi.</p> <p>Prenosljive spretnosti</p> <p>Študent pridobljene spretnosti in teoretična znanja uporablja pri svojem razvojnem delu, raziskovalnem delu in pri študiju ostalih vsebin na področju kemije in biokemije.</p> | <p>Intended learning outcomes:</p> <p>Knowledge and Comprehension</p> <p>student is familiar with biologically important natural products:</p> <ul style="list-style-type: none"> • their sources, • properties, • applications, • main semisynthetic and synthetic transformations. <p>Application</p> <p>Student will be able to use the acquired knowledge during his further professional development. This knowledge will enable him to efficiently resolve the problems in the field of natural compounds.</p> <p>Analysis</p> <p>Student is capable of planning isolation procedures, purification and characterization of typical natural products. Student can critically evaluate obtained results comparing to literature facts.</p> <p>Skill-transference Ability</p> <p>Student can use acquired skills and knowledge during his professional development, research work and study of other subjects concerning chemistry and biochemistry.</p> |
|--|---|

Metode poučevanja in učenja:

| | |
|--|---|
| <p>Predavanja in skupinski projekti.</p> | <p>Learning and teaching methods:</p> <p>Lectures, group projects.</p> |
|--|---|

| Načini ocenjevanja: | Delež/Weight | Assessment: |
|---------------------|--------------|--------------|
| Pisni izpit | | Written exam |
