

## 19. 9. 2017 - Cutting Edge 2017 - 1<sup>st</sup> announcement

Once again, Cutting Edge conference will bring together young and established researchers to discuss the topics in three main sections listed above.

We are also thrilled to announce our first invited speaker:

**dr. Andrej Grubišič**, Slovene scientist at NASA,

who will open the Materials of the Future session!

**WHEN?** Tuesday, 19. 9. 2017

**WHERE?** Faculty of Chemistry and Chemical Technology, University of Ljubljana, Večna pot 113, 1000 Ljubljana, Slovenia

**WHO?** Master students, PhD students and Post-docs (finished PhD in 2013 or later), who work in the field of any of the three topics the conference covers, are welcome to actively participate, to present their work as an oral presentation or with a poster. All the rest, welcome to join us as passive participants!

**WHY?** Oh, we do not even know where to start!

- We aim to enable young scientists a possibility to present their research to their peers, to discuss the results and to entangle the scientific problems from various perspectives.
- This year we made a special collaboration with Acta Chimica Slovenica, enabling young authors to submit and publish their own scientific article. The ones chosen for the publication will present their work as oral presentations.
- Since we know how expensive the registration fees can be, we will keep them at a symbolic price for all the participants this year as well (10 € for students and 35 € for other participants).
- We will bring to you the possibility to listen to lectures from three established researchers and discuss your work with professors.
- There will be chocolate chip cookies.

**HOW?** Visit our webpage and fill in the application. Applications for oral and poster presentations are accepted until Friday, the 30th of June 2017. The registration fee is 10 € for students and 35 € for other participants. More information is provided on the page [www.cutting-edge.si](http://www.cutting-edge.si). And don't forget to tell all your friends and colleagues about it. Even those from abroad, since the event will be in english.

Best of luck with your research and see you in September 2017!

The organizing committee of Cutting Edge 2017
