(Meeting ID: 952 4967 4178)

*Vljudno vabljeni!*

**Abstract:**

In the last years, the food style has been evoluted. Currently, consumers not only want to eat, but they also want to eat “health”. For that reason, the consumption of foods that claims to promote health benefits or even the prevention and treatment of diseases due to the presence of bioactive compounds has increased exponentially. Therefore, functional foods and nutraceuticals entail an important development opportunity of the agricultural-food industry which results into health promotion and increase life expectancy. The several steps of the workflow to design functional foods and nutraceuticals will be revised and the latest achievements of my group will be exposed.
