

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet: PRINCIPI ZELENE KEMIJE
Course Title: PRINCIPLES OF GREEN CHEMISTRY

Študijski program in stopnja Study Programme and Level	Študijska smer Study Field	Letnik Academic Year	Semester Semester
UŠP Kemija, 1. stopnja	/	3.	6.
USP Chemistry, 1 st Cycle	/	3 rd	6 th

Vrsta predmeta / Course Type:

izbirni strokovni / Elective Professional

Univerzitetna koda predmeta / University Course Code:

KESI8

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje Work	Druge oblike študija	Samost. delo Individual Work	ECTS
15	15	45 LV	/	/	75	5

Nosilec predmeta / Lecturer:

izr. prof. dr. Jernej Iskra / Dr. Jernej Iskra, Associate Professor
 prof. dr. Marjan Jereb / Dr. Marjan Jereb, Associate Professor

Jeziki / Languages:

Predavanja / Lectures: slovenski / Slovenian

Vaje / Tutorial: slovenski / Slovenian

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Študent oz. kandidat mora imeti predmet opredeljen kot študijsko obveznost.

Prerequisites:

The course has to be assigned to the student.

Vsebina:

Paradigma zelene kemije:

Principi zelene kemije, trajnostni razvoj, krožno gospodarstvo.

Metrika zelene kemije:

Ovrednotenje okoljskih parametrov reakcije, atomska ekonomija, E-faktor, LCA...

Alternativna topila (voda, ionske tekočine, superkrična topila, organska topila).

Alternativni procesi in aktivacija (kataliza, katalizatorji na trdnih nosilcih, biokataliza, encimi, mikrovalovi, ultrazvok, fotokemija, elektrokemija).

Biomasa kot vir kemikalij (biorafinerije).

Content (Syllabus outline):

The paradigm of Green Chemistry:

Principles of green chemistry, sustainable development, circular economy.

Green Chemistry Metrics:

Assessment of environmental parameters of reaction, atom economy, E-factor, LCA...

Alternative solvents (water, ionic liquids, supercritical solvents, organic solvents).

Alternative processes and activation (catalysis, solid supported catalysis, biocatalysis, enzymes, microwaves, ultrasound, photochemistry, electrochemistry).

Biomass as source of chemicals (biorefineries).

Temeljna literatura in viri / Readings:

Green Chemistry: An Introductory Text, Mike Lancaster, 2. izd., RSC Publishing, 2010.

Dopolnilna literatura

Introduction to Chemicals from Biomass, James H. Clark, Fabien Deswarte, Wiley, 2008.

Green Chemistry Metrics: A Guide to Determining and Evaluating Process Greenness, Andrew Dicks, Andrei Hent, Springer, 2015.

Cilji in kompetence:

Cilj predmeta je razvijati zavest o še donedavna zapostavljenem vidiku kemije, ki posveča poseben poudarek 'sredstvom' ne samo 'cilju'. Eno od temeljnih vodil zelene kemije je optimizacija vsake stopnje oz. postopka v nekem procesu do te mere, da ima čim manjši vpliv na okolje (količina topil, presežki reaktantov, postopek izolacije in čiščenja), da je energetsko nepotraten (npr. mikrovalovna aktivacija namesto termične) in kot celota tudi čim bolj ekonomsko upravičen. Študenti si pri predmetu pridobijo naslednje

specifične kompetence:

- vsaj delno premagovanje nekaterih stereotipov v kemiji
- praktičen pristop in izvedba transformacij pod 'zelenimi' pogoji
- kritičnost presoje pri izbiri metod in tehnik za izolacijo in čiščenje produktov
- osnove načrtovanja in možnosti alternativnih sinteznih pristopov
- okrepitev ozavešanja o globalnem problemu varovanja okolja

Objectives and Competences:

Learning outcomes: Development of knowledge of the so far neglected aspect of chemistry which devotes attention to 'means' and not only to 'aims.' One of the fundamental principles of Green Chemistry is optimization of each step or a proceeding in a certain process to minimize the impact on the environment. The amount of solvents, excess of reactants, isolation and purification procedure, energy efficiency (microwave activation instead of thermal, for example) and economic viability are the governing parameters in this regard.

Competences: Overcoming some stereotypes in chemistry; Practical approach and realization of transformation under 'green' conditions; Critical judgement in choosing isolation and purification methods and techniques; Base planning and alternative synthetic approaches. Strengthen the perception of the global protection of the environment.

Predvideni študijski rezultati:

Znanje in razumevanje

Poleg spoznanja načel zelene kemije študenti pridobijo osnovno znanje in razumevanje postopkov in transformacij pod pogoji, ki so okolju prijazni. Pridobijo osnove o alternativnih in obnovljivih reakcijskih medijih, reagentih in katalizatorjih. Spoznajo se z nekaterimi manj pogosto obravnavanimi reakcijskimi sistemi.

Uporaba

Področje zelene kemije je eno novejših, hitro se razvijajočih področij, in hkrati trendov v kemiji. Grozeče, ponekod že katastrofalne posledice človekovega nepremišljenega

Intended Learning Outcomes:

Knowledge and Comprehension

Besides cognition of the Green Chemistry principles, students acquire basic knowledge and comprehension of proceedings and transformations under environmentally friendly conditions. They acquire a basic knowledge on alternative and recyclable reaction media, reagents and catalysts. They get some insight into less discussed reaction systems.

Application

The field of Green Chemistry is one of a novel, fast developing areas and, simultaneously, trends in chemistry. Horrible and in some cases yet disastrous consequences of inconsiderate

delovanja, bodo človeštvo prisilile v mnogo bolj preudarno ravnanje. Težišče vsesplošnega razvoja v kemiji bo po vsej verjetnosti vedno močnejše povezano z načeli zelene kemije.	human actions are going to force the mankind to act much more prudent. The focus of the common development in the future is likely going to be more and more strongly linked with the Green Chemistry principles.
Refleksija Študenti se seznanijo z osnovami in problematiko zelene kemije, nadgradijo klasično pojmovanje kemije, analizirajo in primerjajo strategije in pristope klasične in zelene kemije.	Analysis Students acquire basic knowledge and problems of Green Chemistry, and they upgrade the 'classical' comprehension of chemistry. They analyse and evaluate 'classical' and Green Chemistry strategies and approaches.
Prenosljive spretnosti Študent pridobi osnovne kritične presoje in ocene postopkov ali procesov z vidika standardov, ki se nanašajo na varovanje in zaščito okolja. Utrdi znanje in spretnosti o praktičnem delu in dobri laboratorijski praksi.	Skill-transference Ability Students acquire the basics of critical judgement and evaluation of proceedings or methods from the viewpoint of protection of environment. They deepen their knowledge and skills of experimental work and good laboratory practice.

Metode poučevanja in učenja:

Predavanja, seminarske in laboratorijske vaje.

Learning and Teaching Methods:

Lectures, seminars and laboratory work

Delež (v %) /

Weight (in %)

Načini ocenjevanja:

Assessment:

- opravljene laboratorijske vaje in kolokvij iz vaj - pisni izpit: pozitivno (6-10); negativno (1-5)		- accomplished laboratory work - test - written exam
